STEVENS & HOLLOWAY,

WE STILL OFFER

Our home "Riverview" for sale.

This property is not equalled in the
state at the price that we offer it
for. To any one wanting a home

with every modern improvement,
located superbly, with ample
grounds surrounding it and at a

price below cost, this is the golden
chance.

We offer this property for sale
solely because it is too large for us
to occupy and our desire is to

build a smaller one. If we can sell
this within the next 15 days (before
May 1st), we will do so on the easi-
est of terms. If not sold previous

to May 1st we shall begin house-
keeping in it and withdraw it from
the market.

Yours very truly,

GEO. L. & SARAH H. CARRINGTON.

For An Invest- ment

We have a property centrally lo-
cated, rented for \$21.50 per month,
payable in advance. It is sure to

rent for this or more for all time.
This is over eight and a half per
cent, on the price we ask for it.

There is a mortgage of \$1600 to
run 3 or 5 years at seven per cent.

Our price is \$3000; \$1000 cash,
\$400 to be secured on the property
ten years at seven per cent. A year

figure it out, it will take \$140 a year
to pay your interest on the \$2000;
taxes say \$15; insurance \$5. Take

this amount \$180 in all from the
\$258 rental and it leaves you \$78 net
for the use of your \$1000. Besides

this the property is sure to advance
from \$200 to \$500 within 5 years. It
is worth looking into.

Yours very truly,

GEO. L. & SARAH H. CARRINGTON.

Yesterday, April
13th

The masons began plastering our
pretty little six room house. We
expect to be able to deliver this

house first week in May, all com-
plete. We will sell it on the easiest
of monthly payments with a cash

not to exceed \$200. In fact you
can make terms with us that cannot
be duplicated elsewhere. Let us

show you this place.
Yours very truly,

GEO. L. & SARAH H. CARRINGTON.

That Little Cot-
tage

At \$900; \$100 cash; \$500 mortgage,
balance payable \$5.00 per month,
deferred payments, bearing interest

at seven per cent is a little home
somebody wants. Come and see us.
Yours very truly,

GEO. L. & SARAH H. CARRINGTON.

Homesites Ga-
lore

In Forest Park, Glen-Etta, River-
view, Carrington, Wheeler and
Whitehead's addition, Riverside

and Spring Brook. In these six
beautiful additions are located the
most attractive lots for speculation

also, in the city of Janesville. Buy
anywhere in any one of these local-
ities and you have a SURE THING.

If you are in want of investments
to pay a profit, invest here. If you
want a home site you make a mis-
take if you buy without seeing us.

Yours very truly,

GEO. L. & SARAH H. CARRINGTON.

"OLD HUTCH" IS GONE.

The Famous Chicago Speculator
Still Missing.

THOUGHT TO HAVE GONE TO FLORIDA.

The Greater Portion of His Wealth Taken
Wings and He is Practically Ruined by
Catastrophic Speculations—
His Mind Gives Way.

SENSATION IN CHICAGO.
CHICAGO, April 30.—B. P. Hutchinson,
the veteran wheat speculator, known
the country over as "Old Hutch," has

been missing since Tuesday evening,
at which time he bid a friend good-by
and said he would never be seen again.

He has many heavy open trades,
and the many rumors circulated in re-
gard to his disappearance have greatly
disturbed the market. His son, Charles

L. Hutchinson, president of the Corn
Exchange bank, and ex-president of
the Board of Trade, says his father

has been mentally unsound for two
years. A few months ago it was re-
ported that Mr. Hutchinson's fortune

had been almost entirely dissipated in
speculation. At that time a number
of Mr. Hutchinson's friends and his

son tried to induce the old gentleman
to give up speculation and lead a quiet
life, but their efforts met with no suc-
cess.

It is reported in certain circles that
unfortunate "plunging" has caused his
disappearance, and that his liabilities
will reach away into the millions.

When asked if his father had failed,
his son, Isaac Hutchinson, laughed
and said: "Not for a cent; every
dollar he owes will be paid. The only

trouble is that some margins are due.
I don't intend to pay them until I get
orders from father. It wouldn't be
safe, you know. Some of the brokers

who have deals with him are closing
them out; others are carrying them at
their own risk. But no one will lose a
cent, for when he comes back he'll pay

everybody he owes." Later on young Hutchinson admitted to a reporter that his father was financially embarrassed. Said he: "Father has been demented for some time. Affairs on the board have been going against him. We have hoped that he would be able to tide over, but things have gone from bad to worse and it is no use. I came down here this morning and found that father had not made his appearance. I knew then that trouble was in store. I admit that he has suspended business. His outstanding accounts amount to some \$2,500,000 in open trades alone. But he will pay dollar for dollar. However, I do not think he will ever resume business."

Mr. D. Russell, of the commis-
sion firm of Russell & Barrett, said
Wednesday afternoon: "Mr. Hutchin-
son has bought and sold through us during the last few months 1,000,000 bushels each of wheat and corn. In these transactions he lost not more than \$3,000. I estimate his losses during the last fourteen months at not less than \$2,000,000. The largest amount lost by him in one deal was \$200,000, when he acted as the Chicago broker for Sawyer & Wallace when they attempted to corner pork. Since then his losses have been very heavy, although his present financial condition, in my opinion, has been grossly exaggerated. We place his obligations at \$3,000,000 and his available assets at \$500,000, representing a net loss of \$2,500,000. I am informed that about four months ago he settled \$500,000 on his wife and youngest son, retaining for his own use about \$200,000, all of which I believe he has lost since that time."

Dispatches from Evansville, Ind., and Nashville, Tenn., state that Mr. Hutchinson had been recognized while passing through those cities on a south-bound train. It is known on leaving Chicago he purchased a ticket for Pensacola, Fla. The announcement of the great speculator's disappearance and probable failure created a flurry on the board of trade Wednesday morning, and the market suffered a decided decline. Later, on assurances from members of his family that his affairs were all right, the market became easier.

(Benjamin P. Hutchinson was born at Danvers, Mass., in 1838. As a farmer's boy he devoted his talent for trading and money-making. At an early age he went to Lynn, Mass., and began shoe-making on his own account, selling his products in Boston and carrying back goods which he sold at a profit. In 1867 he suffered in the general panic and came west. He located in Milwaukee, but in 1868 he came to Chicago, became a member of the board of trade and began operating in grain. He exhibited the shrewdness that afterward characterized him from the first. He was a daring but careful operator, and in a few years had paid off all his eastern indebtedness and was still worth \$50,000. He engaged in pork packing and made money at that, and also cleared up a big profit in whiskey when the changes in the revenue laws were made.

Mr. Hutchinson, until a few years ago, conducted everything he undertook to a successful issue. In his earlier days he was a soap-maker, occasionally running a "corner." He was through all the exciting events on the board of trade, including the McGeech-Everingham failure, but always came out on top. His last big deal operated on the "corner" plan, is said to have netted him a profit of \$1,000,000. It was his last grand stroke. For a year the old man had been unfortunate in many ways, and his friends have known that he was falling mentally. His trading days were probably numbered when he disappeared on Tuesday night, and hereafter he will be but a memory in the great mart in which he was so long a master.)

Killed Himself.
OTTUMWA, Ia., April 30.—John Reeves, the well-known baseball player and last year's umpire in the Illinois-Iowa league, Wednesday morning stepped behind the counter of the Baker house, where he was employed as solicitor, and blew out his brains with a revolver. Domestic infelicity was the cause. Three hours after his death a letter came from his wife, saying that the breach had been healed and she would live with him again.

Flames in a Prison.
STILLWATER, Minn., April 30.—Fire broke out at 9 o'clock Wednesday evening in the paint shop of the Illinois-Iowa building, 75x135 feet, was totally destroyed, with contents. Loss on property of the Minnesota Trust and Company and valued at \$50,000; fully insured.

Murdered His Father.
CINCINNATI, Ia., April 30.—George E. Noah and his 22-year-old son quarreled over a broken necktie Wednesday. The latter procured a shotgun and instantly killed his father.

A Mountain of Charcoal on Fire.
MARQUETTE, Mich., April 30.—A small mountain of charcoal, containing over 250,000 bushels, is slowly burning to ashes near the Pioneer furnace, Ne-gamie. The fire, though under con-trol, may burn for a month. The charcoal belongs to the Pioneer Furnace Company, is worth \$24,000 and is in-sured for \$15,000.

They Want a Republic.

PARIS IN A TREMOR.

Extraordinary Precautions Against a Po-
ssible Outbreak by Anarchists on May
Day—The Military Ready for Action at
a Moment's Notice—Precautions in Other
Countries.

PARIS, April 30.—A most serious feel-
ing of alarm prevails in official
circles here at the possibility of
an anarchist outbreak on the
1st of May. As a result the mili-
tary and police authorities have

taken and are taking the most extreme
precautions possible to effectually meet
and promptly suppress any disorder
on the part of anarchists or others.

Several violent anarchist man-
ifestoes, intended to incite the
soldiers composing the garrison of
Paris and its neighborhood to re-
volt, have recently been circulated by
agents of the anarchists. Several of
these incendiary documents are in the
possession of the police, who are
now engaged in searching the re-
sidences of the anarchist leaders.

It is announced that from now until
the May day excitement is over, no
soldiers will be allowed to leave their
barracks except on guard duty or to
bring in supplies of provisions, etc.

Even the officers are confined to their
barracks. To each soldier of the gar-
rison one hundred rounds of ball
cartridge have been distributed. The
military authorities have also ar-
ranged plans of communication with
the different military posts, bar-
racks and forts, and have completed
arrangements for the concentration
and distribution at points of van-
tag of the troops available in
case of disorder. Thus the en-
tire military and police forces of
Paris are prepared almost at a mo-
ment's notice to issue forth from their
quarters and occupy the streets and
squares of Paris in such a manner that
any anarchist movement will be pretty
sure to be nipped in the bud, however
well planned it may be.

ROME, April 30.—The government is
making elaborate preparations for May
day; seldom have such precautions been
taken to guard against an outbreak.

There will be 10,000 men in barracks
in Rome, besides numerous detach-
ments scattered about the city. Two
companies of infantry will be sta-
tioned to-day, and the first in St.
Peter's square, two squadrons of
cavalry in the royal palace, two com-
panies around the chamber of de-
puties, and detachments at the principal
banks, the bourse, the leading art gal-
eries and other points which are espe-
cially desired to guard against possible
attack. Similar measures, though neces-
sarily on a smaller scale, are being
arranged in the other cities of Italy. In
Turin and Milan the police have ar-
rested many anarchists on the charge
of inciting the military to mutiny.

MADRID, April 30.—Valencia, Bilbao,
Cadiz, Barcelona and the principal
manufacturing towns of Catalonia are
agitated. The bakers threaten to
strike. The socialists have obtained
permission to hold monster eight-hour
demonstrations, but they must not
gather in the streets. Troops have
been sent to all places where trouble is
feared. A fleet has gone to Barcelona.

HARRISON'S JOURNEY.
The President Visits Senator Stanford's
Stables—Incidents of the Day.

SAN FRANCISCO, April 30.—President
and Mrs. Harrison and party left San
Francisco at 9 o'clock Wednesday morn-
ing for Palo Alto on a special train, ac-
companied by Mayor Anderson and a
committee of San Francisco citizens.

Short speeches were made at San
Mateo and Redwood City, where a
large and enthusiastic crowd had
gathered. The president briefly ad-
dressed them. Menlo Park was reached
at 10 o'clock. Senator and Mrs. Stan-
ford, Senator and Mrs. Stanford, and
Mrs. Markham and a party of friends were
waiting at the station with carriages.

The president, accompanied by the
others, then visited the Stanford uni-
versity buildings and the Palo Alto sta-
bles and stock farm.

San Jose, April 30.—The presi-
dential train arrived here at 4 o'clock.
The party was given a reception at the
Hotel Vendome.

DEL MONTE, Cal., April 30.—Presi-
dent Harrison and his party arrived
here at 7 o'clock and remained until
morning. The president, when in-
formed that the Chinese emperor had
refused to receive Mr. Blair as the
United States minister, said it was
news to him. He declined to discuss
the matter.

Many Houses Burned.
CATSKILL, N. Y., April 30.—Twenty-
four frame dwelling houses in the vil-
lage of Leeds were burned Tuesday.
The heaviest loser is ex-Judge Hil-
ton, of New York, owner of the
greater part of the village. His prop-
erty burned included the office build-
ing, the lower wool mill and four-
teen dwellings, comprising thirty-five
tenements, nearly all vacant, as the two
mills at Leeds owned by Judge Hilton
have been shut down since 1881. Loss,
\$40,000; partially insured. The village
has no fire apparatus.

Killed Himself.
OTTUMWA, Ia., April 30.—John Reeves, the well-known baseball player and last year's umpire in the Illinois-Iowa league, Wednesday morning stepped behind the counter of the Baker house, where he was employed as solicitor, and blew out his brains with a revolver. Domestic infelicity was the cause. Three hours after his death a letter came from his wife, saying that the breach had been healed and she would live with him again.

Flames in a Prison.

Milwaukee's Tribute to One of
Humanity's Champions.

TRIBUTE TO THE LATE HENRY BERGH.

Ceremonies Attending the Dedication of a
Fountain and Statue to His Memory
Erected in the City Hall
Square.

A GREAT WORK OF ART.
MILWAUKEE, April 30.—The fourth
public monument of which the
Cream city can boast was un-
veiled here on Wednesday in the
presence of several thou-
sand spectators. It is a memo-
rial erected in honor of the la-
mented Henry Bergh, organi-
zer and first president of the New
York society for the prevention
of cruelty to animals, and is in the
form of a sculptured fountain for man
and beast. The memorial is erected
upon what was formerly known as
Market square, but which will hereaf-
ter be designated as City Hall square, at
the junction of East Water and Market
streets.

The circular basin, or drinking
trough, of the Bergh fountain has a cir-
cumference of 90 feet and is prob-
ably the largest receptacle of its kind
in the world. It is composed of five
solid blocks of granite, each weigh-
ing twenty-five tons. The coping of
the main drinking basin is 3 feet above

the level of the street, and smaller
basins, projecting from the main basin
and nearer the street level, will hold
water for thirsty canines. The fountain
proper, or monument, rises from a pile
of rockwork in the center of the main
basin and is a symmetrical base of in-
scribed, with gargoyles spouting jets of
water into small basins projecting be-
low them on each of four sides. This
granite pedestal is surmounted by a
lifelike bronze statue of Mr. Bergh,
who is represented in the act of fond-
ling a wounded dog. The stricken ani-
mal looks upward affectionately into
his kindly face.

The designer of this splendid statue
is J. H. Mahoney, of Indianapolis,
while N. C. Hinsdale, of the same city,
drew the plans for the basins and foun-
dations. The idea of the memorial
originated with the president of the
Wisconsin Humane society.

After the Divine blessing was invoked
George W. Peck, on behalf of the
Wisconsin Humane society, made a
formal presentation of the memorial
to the city of Milwaukee, and the
response was made by Mayor
or Senators. Prof. Swing, of Chi-
cago, delivered the oration of the day,
eloquently eulogizing Mr. Bergh and
the great work he inaugurated, and
supplementary remarks were made by
Mr. Bergh's son, who came from New
York city to participate in the ex-
ercises.

Col. J. A. Watrous read a poem writ-
ten for the occasion by Mrs. Ada E.
Hower, of Milwaukee, and short
speeches were made by Alderman Gerry,
W. Hazelton and Edward Lee Brown,
of Chicago, president of the American
Humane association.

TWO WERE KILLED.
An Alabama Opera House Collapses.
Burying Many of the Ruins—Two Lives
Lost and a Number of Persons Hurt.

TRUST, Ala., April 30.—The opera
house fell in Wednesday afternoon
while a party of young people were re-
hearsing an amateur performance.

About twenty persons were buried in
the ruins. The dead ones: Miss Anna
Foster, of Eastman, Ga., and Miss
Fannie Lou Starke, only child of
Judge B. W. Starke, of Troy. The
seriously injured are: Miss Maggie
Burnett, lately of Bainbridge, Ga., and
Miss Lula Downing. Others were hurt
but not seriously. The accident result-
ed from the spreading of the roof,
which was faulty in self support-
ing but was faulty in construction.

TWO LICENSES OR ONE?

The Council to Pass on it This Evening.

SALOON MEN ARE HOPEFUL.

They Insist That Low License Will Carry the Day—Talks With Aldermen on the Outlook—Mayor St. John's Message is Brief.

Forty-two men will be on the ragged edge until they hear from the council chamber to-night. They are proprietors of Janeville saloons and are anxious to know what license they must pay.

Mayor St. John has called the meeting of the new council for 7:30 o'clock. The meeting is called for the purpose of perfecting the organization of the council and for general business.

The mayor will deliver a brief message mostly devoted to points raised on the granting of saloon licenses. He will then in all probability announce the standing committee for the ensuing year.

The first business to come before the council when convened will be the election of a president, and this honor will undoubtedly be tendered to Alderman W. T. Vankirk. The election of city assessors will follow him and it is now generally conceded that J. H. Balch and Henry Hemming will be elected without opposition.

The council being a political body, the election of a health officer to succeed Dr. O. P. Robinson, may be indefinitely postponed. The same may be the case concerning city marshal, although should a vote be taken, Marshal Adelson would undoubtedly receive a majority vote. Should a vote be taken for health officer, Dr. James Gibson will be urged for the place by republican members.

Mayor St. John will make no appointment for chief engineer at present, having signified his intention to allow the department to remain as it is.

The action of the council on license is a general topic of conjecture. The saloon men were given considerable encouragement to-day by the circulation of a report that the new council would not exact a double license fee this year, and that it would not be necessary to take a wholesale license unless the person taking it was desired to engage in the wholesale trade. The saloon men placed considerable reliance on these reports, and went so far as to announce that Alderman David Conger, of the First ward, and Alderman Child and Vankirk, of the Second ward, were pledged to vote for only the single license fee.

A reporter met Alderman Conger in his office. In speaking of the rumor the alderman said: "I don't see how such a rumor could be established. I was elected alderman on the double license issue, and it is idle nonsense to expect that I should vote any other way." Alderman Child made the same statement declaring that he would vote for the two licenses.

"No one has any authority to quote me on the question of voting license," said Alderman Vankirk. "I have not really made up my mind, and am not sure that I fully understand the question. It is claimed there has been a radical change in the workings of the license law since last year. Then the license question was in the hands of the mayor; he could recommend whomsoever he saw fit for a license, and he determined to recommend no one for a license except he paid for the wholesale and retail licenses. That power is now taken away from the mayor, and I am told that John Wines says that for a retail license and is refused solely on the ground of not taking out the wholesale license, he can go ahead and sell without a license, and that he will defend the saloon keeper in court. It is claimed the vote of the people fixing the license at two hundred dollars, settled this. There may be some legal points connected with the granting of licenses that may prevent the council exacting the double fee. I am going over to see Mayor St. John about this afternoon. I know, and everybody knows, that there is not a saloon keeper in the city but violates his bond, and I am sorry they were not brought before the council and their licenses revoked. Why, there is not a saloon in the city but you will see card playing and dice throwing, and a minor can go in and get a drink in any one of them for ten cents. I don't know just what will be done. One thing is certain, however. If the single license should be granted it will arouse the high license advocates to renew their agitation, and nated with the temperance people as they were in the last election, they could insure a license fee of five hundred dollars next September. Now I have said as much to you about how I should vote as I have to any one, and no person has authority to say how I will vote, for the reason that I have not determined that point fully myself."

SOME ONE RANG "FIRE OUT."

The School House in Danger, Because of a Meddler.

There is a tendency among those who saw yesterday's fire to put blame upon the water company. In reality the water company was not responsible for the deficient pressure. The weak streams were the result of tampering with the fire alarm system. There is, as every citizen understands a code of signals between the fire department and the engineer at the pumping station. One tap of the fire alarm bell, which is also struck on all the engine house gongs and the gong at the pumping house notifies the water works that the fire is out and that pumps may be stopped.

Two taps call for direct pressure, which means one hundred pounds; this signal repeated calls for one hundred and twenty five pounds; repeated the third time calls for all the pressure that can possibly be applied. Yesterday, before the bells had fairly stopped sounding, some one entered the west side engine house and struck a single blow on the bell and gong. Engineer Spickler obeyed the signal and shut off his pumps. A few minutes later Assistant Engineer Osgood saw that the water supply was insufficient and gave signal for direct pressure. This was responded to in very quick time. The officers of the fire department were entirely satisfied, especially after they had learned of the pre-

STOP FREIGHTS BY AIR.

New System of Brakes on the Northwestern

NO DRUNKS ON THE ST. PAUL

Anti-Liquor Order Ready—Daylight Limited From Chicago Will Be Put on One Week From Sunday—Boycotted for Paying Commissions.

The Northwestern company are putting many new freight cars into service and sixty of them passed through Janeville to-day. The new cars are larger than the ordinary box car, being thirty-four feet long and with carrying capacity of fifty thousand pounds. All are supplied with air brakes and the new Chicago coupler. The new coupler is a great improvement, as brakemen need not go between the cars to couple them. Another very convenient device is the independent air brake which can be operated at the side of the car by a brakeman while switching.

Can't Drink on the St. Paul. The following circular is in preparation and will be distributed. It is said to every employee of the Milwaukee & St. Paul system: "This company will not under any circumstances, employ men who are in the habit of becoming intoxicated. All employees known to frequent drinking places must be warned to discontinue the practice or quit the company's service. Employees will be discharged if intoxicated either on or off duty. No person discharged for intoxication will be re-employed."

He Is Under a Boycott. James Charlton, general passenger agent for the Alton road, visited Janeville to-day. Mr. Charlton has caused himself considerable trouble by his generous way of treating ticket sellers. Charlton allows the ticket agents on other lines commission on all tickets sold over his line by them. This has stirred up a good deal of ill feeling on the part of roads which do not follow his example, and endeavors to boycott Charlton have resulted.

New C. & N. W. Time Card May 10. One week from Sunday the new Chicago & Northwestern time card will go into effect, and it is expected that a limited train will roll into Janeville at 10 o'clock in the morning, and the 2:19 limited will in all probability be taken off.

The officials of the road have nothing to say about the change to be made, and the exact changes in time and trains will not be known until the new time card arrives.

Big Engines on the Limited. Ten-wheel mogul engines will soon be in use for the passenger trains of the Chicago & Northwestern road on this road on this division. The engines now in use are eight-wheel locomotives. The company has had ten new engines built to their order, and they will be used on all fast and limited mail trains. The new engines will be in use on the vestibule, and the new daylight limited.

No Relief for Dry Engines. General Superintendent W. A. Gardner and Chief Civil Engineer Berry of the Chicago & Northwestern, visited Janeville yesterday afternoon and inspected the apparatus for supplying water to locomotives. Engineers have had considerable trouble with the water supply and a new tank and pump will probably be put in.

Sparks and Cinders. Conductor H. F. Darbin, of the Chicago, Milwaukee & St. Paul road, has shaved off his mustache, and now his most intimate friends fail to recognize him.

Blocked yards delayed the Chicago train on the Northwestern for ten minutes this morning.

CARS WILL RUN SUNDAY. The Street Railway to Be Put in Operation at Once.

Superintendent Blunk, of the street railway, says he will have cars running to the cemeteries on Sunday. The horses and mules that have been brought over on Spring Brook farm were wintered to the cars this morning, and men were put at work on the cemetery line. The cars were taken from the barns up in the first ward, and will be overhauled and put in readiness for immediate use, and then men will be put at work on the Milton avenue line. The superintendent thinks the whole line will be ready for use early next week.

THE MILLS MEETINGS. They Will Open About May 12. Say the Janeville Pastors.

Rev. B. Fay Mills will begin his revival work in this city about May 12. The pastors of the city have issued the following circular:

The eminent evangelist, Rev. B. Fay Mills will conduct union services in our city beginning about the twelfth of May, assisted by Lawrence B. Grinnwald, who has helped thousands of Christians into a fuller knowledge of Christ and into more earnestness and joy in his services. They have led thousands of the unconverted to find pardon and peace in Christ as a divine Savior, and to rejoice in a new life. May not you also be helped by these Christian workers, as they come to us? And may not this be the time for which you have waited, when God shall draw near to fill your heart and life with blessing?

We most earnestly invite you to attend as many of the meetings as possible, and to co-operate with us heartily in this work.

We expect the meetings to be of great interest and power, such as we have not had for many years, and we believe that those who fail to make the most of this special occasion will miss one of the rarest opportunities for good that have ever come to their lives.

You will not let other interests stand aside for the time, and plan to be with us constantly while the Evangelists are here?

Yours in behalf of Christ and His church,

M. G. HODGE, M. EVANS, W. F. BROWN, E. L. EATON, B. F. WILDER.

There is a tendency among those who saw yesterday's fire to put blame upon the water company. In reality the water company was not responsible for the deficient pressure. The weak streams were the result of tampering with the fire alarm system. There is, as every citizen understands a code of signals between the fire department and the engineer at the pumping station. One tap of the fire alarm bell, which is also struck on all the engine house gongs and the gong at the pumping house notifies the water works that the fire is out and that pumps may be stopped.

Two taps call for direct pressure, which means one hundred pounds; this signal repeated calls for one hundred and twenty five pounds; repeated the third time calls for all the pressure that can possibly be applied. Yesterday, before the bells had fairly stopped sounding, some one entered the west side engine house and struck a single blow on the bell and gong. Engineer Spickler obeyed the signal and shut off his pumps. A few minutes later Assistant Engineer Osgood saw that the water supply was insufficient and gave signal for direct pressure. This was responded to in very quick time. The officers of the fire department were entirely satisfied, especially after they had learned of the pre-

STOP FREIGHTS BY AIR.

New System of Brakes on the Northwestern

NO DRUNKS ON THE ST. PAUL

Anti-Liquor Order Ready—Daylight Limited From Chicago Will Be Put on One Week From Sunday—Boycotted for Paying Commissions.

The Northwestern company are putting many new freight cars into service and sixty of them passed through Janeville to-day. The new cars are larger than the ordinary box car, being thirty-four feet long and with carrying capacity of fifty thousand pounds. All are supplied with air brakes and the new Chicago coupler. The new coupler is a great improvement, as brakemen need not go between the cars to couple them. Another very convenient device is the independent air brake which can be operated at the side of the car by a brakeman while switching.

Can't Drink on the St. Paul. The following circular is in preparation and will be distributed. It is said to every employee of the Milwaukee & St. Paul system: "This company will not under any circumstances, employ men who are in the habit of becoming intoxicated. All employees known to frequent drinking places must be warned to discontinue the practice or quit the company's service. Employees will be discharged if intoxicated either on or off duty. No person discharged for intoxication will be re-employed."

He Is Under a Boycott. James Charlton, general passenger agent for the Alton road, visited Janeville to-day. Mr. Charlton has caused himself considerable trouble by his generous way of treating ticket sellers. Charlton allows the ticket agents on other lines commission on all tickets sold over his line by them.
